Balance in treasury 152.8

We have examined the foregoing accounts and found them correctly kept with satisfactory vouchers for the same.

**ALBERT ROGERS,**      { Auditors,  
**AARON BARTON, JR.**

## SUPERINTENDENT'S REPORT.

During the year schools have been held in seven divisions of the district, taught by one male and fourteen different females; eight being residents of Piermont, three of Haverhill, and one each of Newbury, Bradford, Orford and Wentworth. Five taught two terms each. In the northern division, embracing the former districts numbered 1 and 5, the spring term of eight weeks was in number 5 school house, two weeks being taught by Olive A. Dodge and six weeks by Lena B. Hastings. The fall and winter terms of eight weeks each were taught by Ernest S. Underhill, giving the division twenty-four weeks. Number of pupils spring term, 15, girls 9, boys 6. Number in fall and winter terms returned together, 22; girls 12, boys 10.

In the village division, embracing the former numbers 3, 9, and 11, the spring term of 9 weeks was taught by E. May Eaton. Whole number of pupils 33; girls 15, boys 18. The fall term of 7 weeks was in charge of Mary E. Smith. Number of pupils 31; girls 14, boys 17. The winter term is now in session in the new school house with the same teacher as in the fall. If continued 10 weeks it will give the division 26 weeks. Number enrolled 33.

In the brook road division the spring term of 8 weeks and the fall term of 7 weeks were taught by Etta J. Gould. Number first term 18; girls 6, boys 14. Second term, total 12; girls 4, boys 8. This term closed prematurely on account of sickness of teacher. The winter term of 10 weeks was taught by Florence L. Carr. Whole number of pupils 16; girls 4, boys 12. Total number of weeks 25.

In the central division, embracing the former numbers 10, 12, and the union with Orford, the spring and fall terms of 8 weeks each were taught by Jennie C. Andross. Number first term 12; boys and girls equal. Whole number second term 18; girls 10, boys 8. Mabel Johnson taught the winter term of 10 weeks. Number of pupils 11, girls 5, boys 6. Total number of weeks 26.

In the union with Haverhill Bertha M. Pike taught the spring term of 8 weeks. Number of Piermont pupils 5; girls 2, boys 3. Blanche L. Ayer taught the fall term of 8 weeks. Piermont pupils 7; girls 3, boys 4. By misunderstanding of advice the teacher closed earlier than was intended. The division had 16 weeks. No winter term.

In the turnpike division Edith M. Arnold taught 8 weeks in the spring. Total pupils 12, equally divided. Mabel Johnson taught the fall term of 12 weeks. Whole number 17; girls 8, boys 9. The division had 20 weeks.

In the eastern division Nellie M. Underhill taught the spring term of 8 weeks. Number of pupils 14; girls 8, boys 6. Fall term by Julia E. Hibbard, 8 weeks; total number of pupils 14; divided as in spring. The winter term of 8 weeks taught by Mamie E. Marston; Number of pupils 15; girls 8, boys 7. Whole number of weeks 24.

The whole number of different pupils in town attending school during the year as shown by the register is 131; boys 69, girls 61. The number of children in town between the ages of 5 and 15, enrolled by the selectmen, is 167; males 116, females 51, exceeding the number of pupils registered by 37; but 10 who are older than 15, and 2 less than 5 have attended. The cause of the discrepancy between the enrollment and registration is not apparent.

The wages paid teachers averages higher than in any previous year, and we think the work done by them, with one or two exceptions, has justified the advance. We could have hired for less pay, but the cheap plan had been followed till the schools showed it. If they have commenced to improve in standing the extra amount is well invested. It has been the aim of the superintendent in his 33 official visits to benefit the schools by such suggestions and advice as he was able to give, making them practical and critical rather than formal and passive, which might answer the letter of the law, but not its spirit and intent. A more thorough method of instruction in all branches has been urged upon the teachers, which has been adopted with resulting benefit.

In the judicious selection of teachers, aiming to secure the best; in our united effort to raise the school to a higher standard, and the improvement of school houses in the direction of health, comfort and attractiveness, there should be no step backward. The schools and the churches of our country are said to be free; but they will not run themselves; they both cost money, but are the last items of expense that an enlightened and Christian people should grudge or withhold, for from them we derive our most valued products, and from us they demand a generous liberality.

L. E. RISLEY, Supt.

**Geo. W. Smith & Son,**

WHITE RIVER JUNCTION, VT.

# THE BRADLEY FERTILIZERS.

THE increased yearly sales of

BRADLEY'S FERTILIZERS

for the past thirty-one years,

since 1861, are illustrated

by these pyramids. The

sales in 1861 were

about 500 tons, as

represented by this

SMALLEST PYRAMID

1861.

This Pyramid indicates the 1892 sales of Bradley's Fertilizers.

## THE REASONS FOR THIS INCREASE:

The BRADLEY FERTILIZER CO. use only the *best* of crude materials, which are carefully prepared by approved machinery according to formulas based upon thorough field tests, thus furnishing the best plant-food possible to secure. These essential requisites, combined with liberal dealings with the farmers, have made the BRADLEY FERTILIZER CO. the largest manufacturers of Commercial Fertilizers in the world.
